Chinese Delegate Visit:

A business delegate from China visited KSF Darjipara and showed her interest to be a part of it. Hasna Begum, a student of the biogas program, encouraged her to have a better and hassle-free cooking. It has reduced the time and energy that she used to spend on cooking, feeding the kids of the family. Hasna was eventually producing large volume of milk and increased her daily income (approximately 1000 taka daily). She took the package of milking cow and calf which was worth about twenty-five thousand taka. As she was a regular and sincere member of this program, she repaid her first cow loan by milk and cow dung in due time and got a seventh cow loan to KSF. By adopting new innovative practices of cow dung collection, Hasna was able to make cow dung as an additional income source. The cumulative saving balance (BDT) is 12 million+. Hasna’s dairy farm is an example of how women have become the pioneers of their communities. They visited KSSK students. They played, made art and crafts and sang songs with the distinguished guests. The guests were amazed by the creativity and enthusiasm of the students.

Team Teatulia and OSU having conversation with the beneficiaries and stakeholders of Kazi Shahid Foundation. Dr. Shahana Chowdhury, R&D manager of Kazi Shahid Foundation, was present in the event. CEO and President of Kazi Shahid Foundation, Ayesha Tasnim Mostafa, explained the benefits of KSF Biogas and Bio-fertilizer Program at the event. As a result of the KSF Biogas Program, the gender-mainstreaming strategy in their life, and workplace of women has been demonstrated. It was a very fruitful visit for the team to learn the food safety and hygiene maintenance during the program.

Ronochondi is a remote village in Panchagarh, where a gender awareness training session was held with HR team of Gemcon group and Gender specialist Panchagarh staffs participating in gender awareness session.
